

LAURA T. W. OLIVE

Senior Consultant

Dr. Olive earned her Ph.D. in Economics from Northeastern University in 2013, specializing in Industrial Organization, where she studied the effects of federal regulation and competition on telecommunications and freight rail transportation. At NERA, Dr. Olive specializes, among other assignments, in the application of economic principles to issues in the energy sectors in the U.S., Canada, Europe, Australia, and New Zealand. She analyzes institutional and quantitative questions for competitive and regulated oil, gas, and petroleum product markets, including civil, administrative, and international arbitration cases involving market power and equity valuation for pipelines, refineries, liquefied natural gas (LNG) projects and oil field services. Dr. Olive's experience includes analyses of the value of upstream and midstream oil and gas assets, including LNG facilities, interstate pipelines, and gathering systems. She publishes and speaks to legal and industry groups on question of gas pipeline access for electricity markets, LNG market development, and US gas and oil regulatory problems and developments.
