

**EBA December Brown Bag Meeting/Teleconference  
The EBA Natural Gas Regulation Committee presents:  
Gathering, Processing, and Other Midstream Agreements**

**December 13, 2012  
12:00 noon – 1:30 p.m. (EST)**

**Location: Washington, DC**

Natural gas gathering, processing, and other midstream services agreements are necessary to get natural gas production to market. The importance of, and risk associated with, such agreements is heightened when additional infrastructure must be constructed to accommodate new production. As a consequence, these agreements have become critical with the recent increase in production from shale plays, such as the Marcellus, Utica, Haynesville, and Eagle Ford. This program will discuss typical legal and commercial issues that arise with these agreements.

The speaker panel includes: Bill Wolf, Assistant General Counsel at CenterPoint Energy, and Randy Rich, Pierce Atwood LLP.
