## Andrea Wolfman

Andrea Wolfman practices in the firm's Energy Group, with a primary focus on the regulation of companies in the electric, natural gas and oil pipeline industries. She counsels and represents these companies in the areas of enforcement defense and compliance review, applications, rate and tariff proceedings, rulemakings and the implementation of new rules. Before entering private practice, Ms. Wolfman was a long-time senior executive at the Federal Energy Regulatory Commission (FERC), where she participated in policymaking for the restructuring of the natural gas and electric industries. In her last position at FERC, from June 2000 to September 2002, she led the commission's enforcement office as the Associate General Counsel for Market Oversight and Enforcement. Prior to that, for 13 years, she was the Assistant General Counsel for Pipeline Rates, responsible for the office that produced the orders and regulations governing natural gas and oil pipeline rates and terms of service, during the years of restructuring in the natural gas industry.

During her 24 years at FERC, Ms. Wolfman also spent six years in the agency's Solicitor's Office, representing the FERC in the U.S. courts of appeal. She began her career at FERC as a trial attorney representing the Commission staff in pipeline rate and certificate cases.

Ms. Wolfman's unusual combination of policy and enforcement experience, combined with her knowledge of FERC processes, organization and policy direction, offer a useful perspective to clients. She provides clients with strategic advice on how to achieve objectives consistent with FERC rules and policies. Ms. Wolfman is a frequent speaker on the FERC enforcement process and compliance with FERC rules. She has also provided compliance training specifically tailored to the circumstances and needs of clients.

Ms. Wolfman is a member of the Energy Bar Association, the Women's Bar Association of the District of Columbia, the Women's Council on Energy and the Environment, the American Association of Blacks in Energy and the board of the Foundation of the *Energy Law Journal*.
