

Craig Glazer

Vice President – Federal Government Policy

Craig Glazer, Vice President – Federal Government Policy, coordinates all of PJM's regulatory and legislative policies before Congress, the Federal Energy Regulatory Commission, the United States Department of Energy and other federal agencies. Glazer also serves as PJM's representative to the Executive Committee of the Eastern Interconnection Planning Collaborative and the International Energy Agency and is a peer reviewer of the International Energy Agency's annual World Energy Outlook.

Prior to joining PJM, Glazer served as commissioner and chairman of the Public Utilities Commission of Ohio. Glazer oversaw Ohio's move toward deregulation of its telephone, natural gas, transportation and electric industries. He also chaired the state's siting board and served as a member of the governor's cabinet.

Glazer remains extremely active on national electricity issues. He frequently testified before Congress and the Federal Energy Regulatory Commission on the development of regional transmission organizations and the needs of the marketplace. Glazer served as a member of the board of directors of the National Association of Regulatory Utility Commissioners, chair of its International Relations Committee, and a member of its Electricity and Energy Resources committees. He also chaired the National Council on Competition in the Electric Industry – an interagency collaborative, which brought together FERC, state public utility commissions, the U.S. Department of Energy, the U.S. Environmental Protection Agency and the National Council of State Legislatures.

He has also served as chair of the board of directors of the Northeast-Midwest Institute, a bipartisan research arm of the Northeast and Midwest regions' congressional delegations. Glazer has served as a member of the advisory councils of the Electric Power Research Institute and the Gas Research Institute.

Glazer is a graduate of the University of Pennsylvania and the Vanderbilt University School of Law.

PJM Interconnection, founded in 1927, ensures the reliability of the high-voltage electric power system serving 65 million people in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. PJM coordinates and directs the operation of the region's transmission grid, which includes over 84,236 miles of transmission lines; administers a competitive wholesale electricity market; and plans regional transmission expansion improvements to maintain grid reliability and relieve congestion. PJM's regional grid and market operations produce annual savings of \$2.8 billion to \$3.1 billion.
